# **Introduction to One Click (Single click) Checkout**

## **Addon:**

Prestashop One click checkout addon adds a functionality in the PrestaShop's front end (on Product Page) through which the customer can buy any product instantly, keeping the current cart on hold.

If a customer has some items in their cart already, and come across another product to purchase and likes it so much that the customer wants to buy that product first, The module provides a 'Buy Now' button on the product page for this functionality, so that user can buy only a particular product and the current cart products are not included in the order and after completion of order the previous cart items are restored automatically.

## **Features of Prestashop One Click or Single click**

### **Checkout Addon:**

1. Prestashop One click (single click) checkout adds a Buy Now button on every product page in the store.
2. Prestashop One click (single click) checkout extension offer the customers a fast and hassle-free direct checkout option.
3. The Quick checkout addon simplifies the checkout process for the online shoppers.
4. Customize the One click checkout(Buy Now) button and match it with your Prestashop theme.
5. Single click to checkout ensures high impact on direct sales.
6. Holds the current cart and checks out the current product only.
7. If the order is not completed then automatically adds the product to the current cart.
8. The Fast checkout addon has a potential to turn your visitors into potential buyers and improves the conversion rates by offering a Faster way to checkout
9. Extremely easy to use backend interface
10. Multi-lingual support

11. Multi-store compatible
12. The Quick checkout addon is compatible with all Prestashop themes and do not conflict with other modules
13. Desktop, Mobile and Tablet responsive design.
14. Prestashop Fast checkout addon is compatible with our One-page checkout module is compatible with our One page checkout module

## **How Merchant will benefit from Prestashop One Click or Single click Checkout Addon:**

1. Prestashop One click(Quick) checkout addon adds a new button to your store, there providing a new feature to your store.
2. Increases the conversion rates and increases the rate of returning customers.
3. Customer are likely to purchase products in a single click rather than going through multiple checkout steps.
4. Customize the One click checkout (Buy Now) button and match it with your Prestashop theme.

## **How Customer will benefit from Prestashop One Click or Single click Checkout Addon:**

1. Customer will get a Quick and Hassle free way to direct Checkout.
2. Customer can checkout in a single click

## **Installation**

After purchasing Prestashop One click(Single click) checkout addon, you will get following files as listed below:

1. Compressed File in ZIP format (contains source code of the module)
2. User Manual

Follow the steps to install Prestashop One click checkout addon:

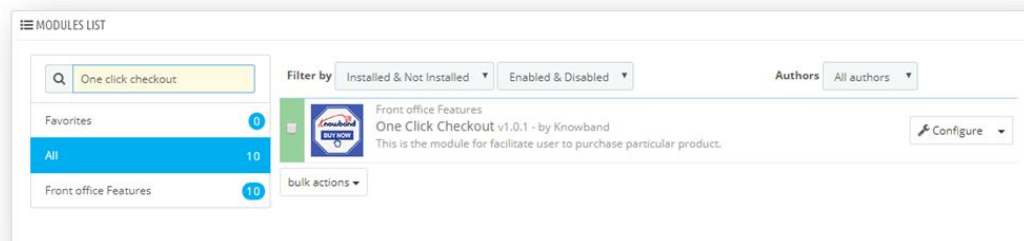

1. Unzip the compressed file. It would contain files and folders as shown below

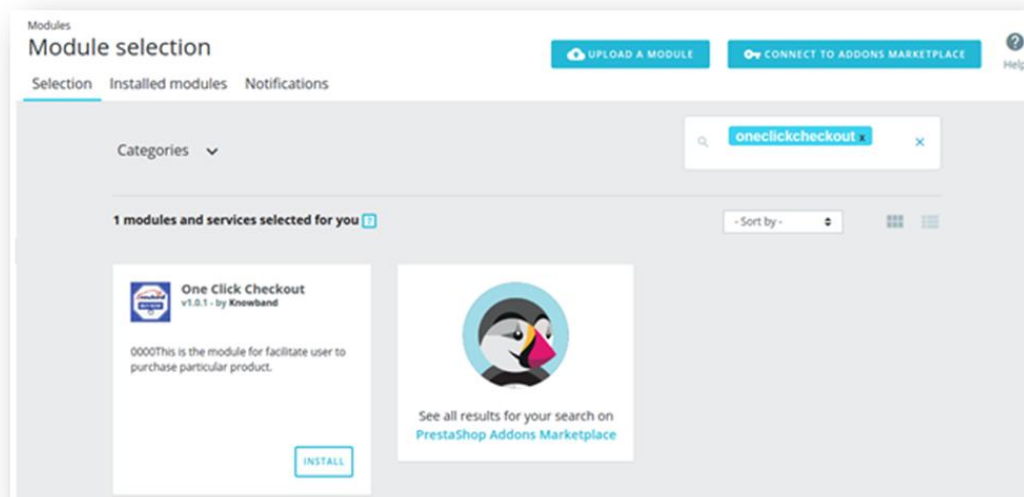

2. Copy all the files and folders of unzipped folder into your store “modules” directory on the path - Root Directory/modules/.

3. Now the addon is ready to be installed on your Prestashop store and you can find that in Store Admin -> Modules and Services. It is shown below:

PrestaShop 1.6

PrestaShop 1.7

4. Click on “Install” button to install the addon. It would show a pop-up for your confirmation. Click on “Proceed with the installation” option. This step

will install the module and show notification - “Module(s) installed successfully”.

## How to configure Prestashop One Click or single click checkout addon?

### Admin Interface

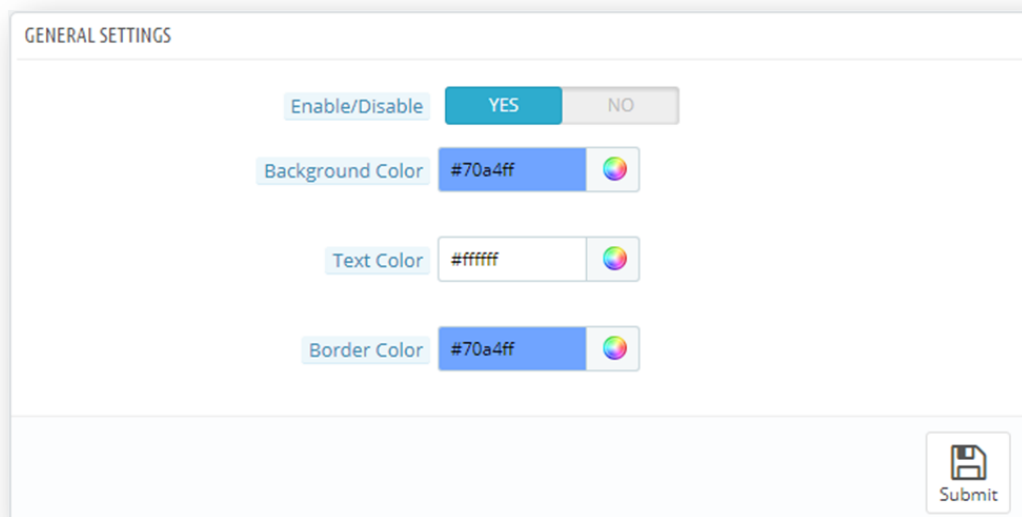

Following interface is provided to Prestashop store admin :

#### 1. General Settings

The interface is explained below:

### General Settings

After clicking on configure link of Prestashop One Click(Direct) Checkout module on modules listing page, system will open General Settings tabs by default as shown in screen below:

The screenshot displays the 'GENERAL SETTINGS' configuration window for the Prestashop One Click(Direct) Checkout module. It features four settings:

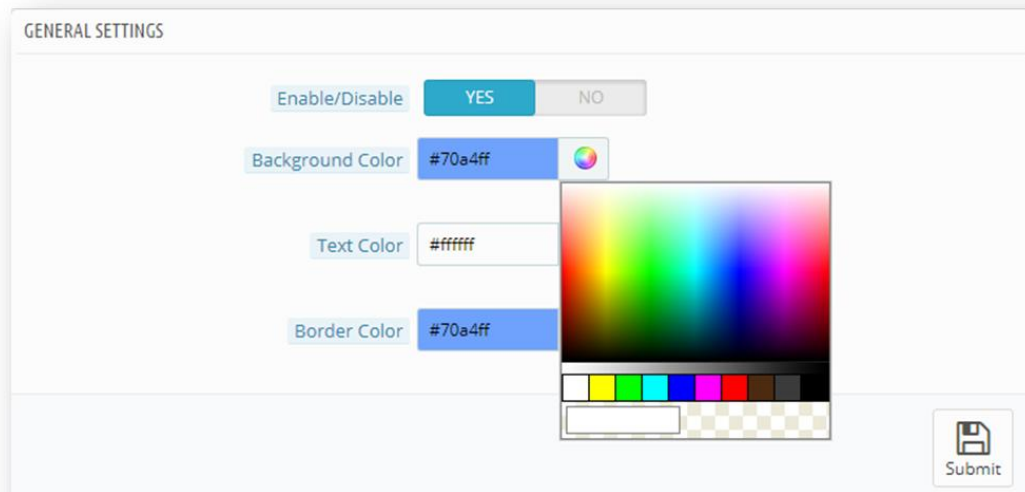

- Enable/Disable:** A toggle switch currently set to 'YES' (blue) with a 'NO' (grey) option.
- Background Color:** A color picker set to '#70a4ff' with a blue background and a color selection icon.
- Text Color:** A color picker set to '#ffffff' with a white background and a color selection icon.
- Border Color:** A color picker set to '#70a4ff' with a blue background and a color selection icon.

A 'Submit' button with a floppy disk icon is located in the bottom right corner of the settings panel.

The configurations will be having respective default values on page load.

**1. Enable/Disable:** Initially, this setting will be “OFF”. User can enable/disable the module’s functionality by turning this “ON/OFF”.

2. **Background Color:** Background color for the Buy Now button at the front product page can be changed by picking a color from color picker of this field.

3. **Text Color:** Text color for the Buy Now button on product page at the front can be changed from here.

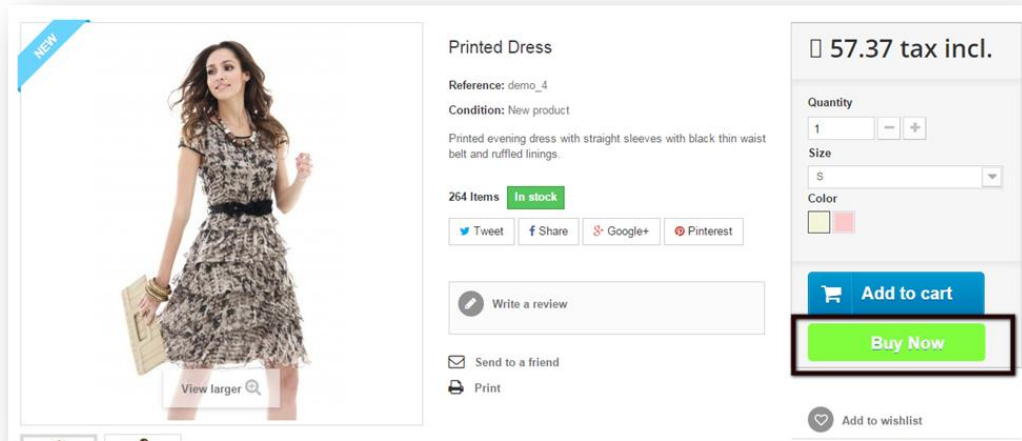

4. **Border Color:** Border color of the Buy Now button at the front product page can be selected from here.

Front End of Prestashop One click checkout Addon

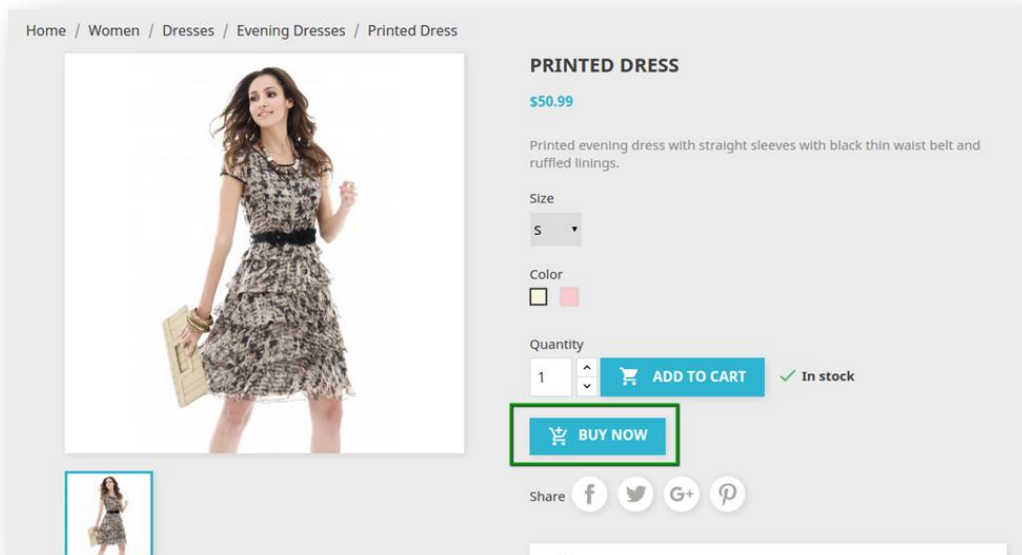

After enabling Prestashop Fast checkout addon the front-end user will see a button (i.e. Buy Now) on the product pages.

The 'Buy Now' button at the front-end appears as follows:

PrestaShop 1.6

## PrestaShop 1.7

After Clicking on Buy Now button user can directly purchase a product excluding the current cart products. The user will be redirected to order page for that particular product. When clicked on the 'Buy Now' button following are the possible cases:

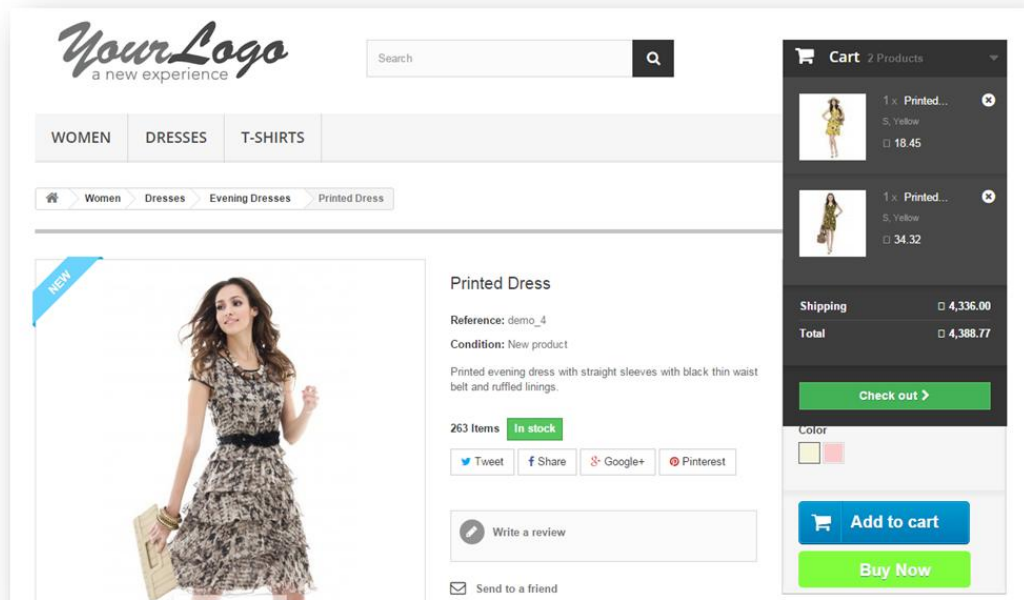

1. Proceed to the checkout process and confirm order
2. Did not Proceed to the checkout process and add the item to the cart with other products
3. **Proceed to the checkout process and confirm order**

If user shopping cart already has some products and a user clicks on buy now button then the user will be redirected to the order page for that particular

product and the user completes the checkout process and confirms the order for that particular product. After confirming the order previous cart of the user will be restored.

PrestaShop 1.7

## Recommendations

1. Refresh home page of your store every time you enable/disable the One click(single click) checkout addon. If Fast checkout addon is not working after installation then please check permissions on modules folder. The folder should be writable. Please make the folder permission to 755.

Find our Prestashop One Click Checkout module on addon store at the provided link below:
